SECURE CABINETS

If you need an initial footprint, our Secure Cabinets are ideal. Each cabinet is a lockable 42u rack, and includes power as needed and a 100 Mbps Ethernet feed connected directly to Xand's fault tolerant network backbone.

SECURE CAGES

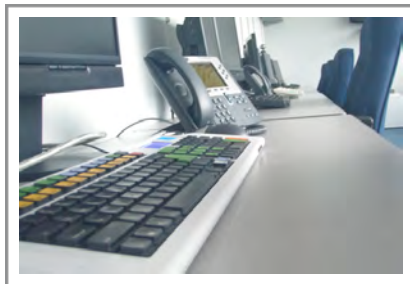

A closed cage environment provides a larger area of physical security and can provide high density solutions for businesses on the cutting edge. Steel cages for colocation are secured by proximity card access control and magnetic locks. A variety of connection options are available, including multiple Ethernet feeds, fiber optic uplinks, and custom power configurations.

DIVERSE CONNECTIVITY OPTIONS

With multiple separate and diverse fiber entrances into Xand's Data Center your colocation presence will have redundant Tier 1 connectivity to keep your business connected. A network backbone complete with PoPs from major carriers, Metro Ethernet services and our own dark fiber ring to NYC, Xand can provision any necessary transport resources. To complement your systems, we offer services such as server migration, monitoring, and other à la carte options from our Fully Managed Services menu.

BUSINESS CONTINUITY WORKSPACE

Xand offers an additional 40,000 square feet of dedicated business continuity workspace solutions. Your facility can be built out into a private DR suite allowing your staff to conveniently work on-site. The Xand resources are flexible and can expand with your business in a pay as you grow model. Our facilities team is agile and dependable and will have you fully operational in no time.

Xcare™ SUPPORT SERVICE

The driving force behind Xand's success is our dedication to support. Over the past 20 years, Xand has earned a tremendous reputation for providing superior customer service.

Xand maintains a network operations center, staffed by expert technicians able to solve any problem you may have. When you call Xand for support, you will never reach a voicemail or answering service, only a live engineer. Since we own and manage our data center, Xand engineers are on-site 24 hours a day.

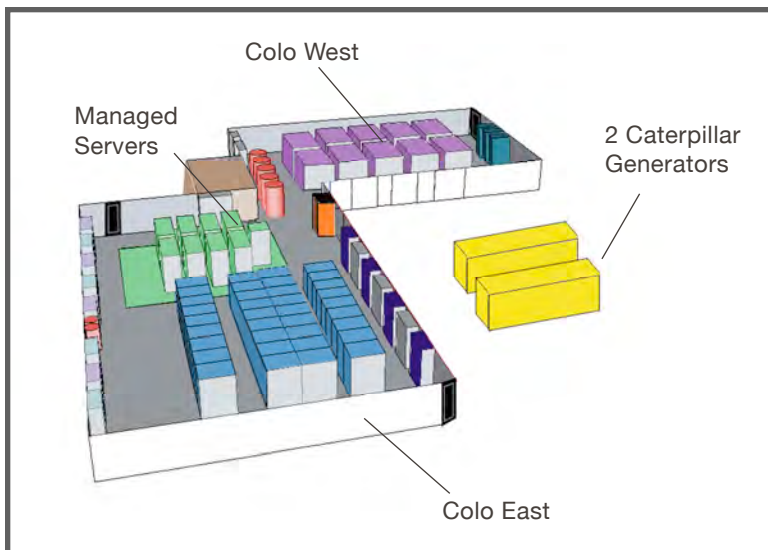

Ideally located 30 miles north of New York City

Xcare™ SUPPORT INCLUDES

- 24 x 7 x 365 Live Technical Support
