Managed Hosting

POWERFUL PLATFORMS

Xand's Dedicated Server Solutions provide guaranteed resource availability for your business. An extensive selection of Intel based server hardware is available to power your business applications. The award winning Dell servers offer single, dual and quad processor platforms for Xand to implement your ideal architecture. Xand maintains everything from the physical layer up to the operating system giving you root access to your device and maintaining the resilient infrastructure to keep your servers up and running.

DIVERSE CARRIERS AND OPTIMIZED PREMIUM BANDWIDTH

Xand's network is extremely resilient with multiple SONET entrances into the facility, and a privately owned and operated fiber optic ring from Xand to two of New York's premier carrier hotels. Fully burstable and BGP blended Tier 1 Internet connectivity can be allocated to your environment based on your business needs.

PROACTIVE MONITORING

The systems housed in our facility will be proactively monitored by our expert team of engineers, 24x7x365. Customized alert thresholds can be designated by you, allowing the Xand team to monitor systems, application availability, and network performance. Xand will take action before performance degradation occurs, and ensure maximum server availability.

PRIVATE CLOUD SERVICES

The term is used everywhere, it's the hottest buzz word in the industry, but the truth is utility computing is nothing new to Xand. The crux of Adaptive eStructure™ is the scalability that comes with cloud services. Xand has been delivering virtualization services and enablement solutions to ASP's, ISV's and the like for the past decade. The technological advancements in recent years now allows us to deliver you cloud enablement services with VMware and a Storage as a Service model. VMware allows for easier provisioning, more seamless failover, and improved scalability. Xand has vetted the options to create a best of breed cloud platform for your business. Benefit from the economies of scale in the cloud built by Xand, delivered to you with world class 24x7x365 Xcare™ support.

All Managed Servers include: Basic Monitoring, Full Event Logs, Xcare™ 24 x 7 Support, DNS Management.

Xcare™ SUPPORT SERVICE

The driving force behind Xand's success is our dedication to support. Over the past 20 years, Xand has earned a tremendous reputation for providing superior customer service.

Xand maintains a network operations center, staffed by expert technicians able to solve any problem you may have. When you call Xand for support, you will never reach a voicemail or answering service, only a live engineer. Since we own and manage our data center, Xand engineers are on-site 24 hours a day.

Ideally located 30 miles north of New York City

Xcare™ SUPPORT INCLUDES

- 24 x 7 x 365 Live Technical Support
- Instant Emergency Response
- Online Trouble Ticket System
- No Charge for Reboots or System Troubleshooting
- 99.95% Availability Backed by Comprehensive SLA
