

The Xand Edge

Does your business have the Xand Edge?

Give your business the edge it needs to succeed: Xand Adaptive eStructure.™

Adaptive eStructure™ gives your company a custom tailored solution, with the ability to grow and change as your business does. By utilizing standard products as building blocks, Xand can quickly and cost effectively build an e-business infrastructure to meet your needs now, and for the future.

Positioning your company for success in today's business world requires that you leverage Internet technologies in innovative ways. Regardless of the industry or size, companies are looking for ways to make themselves more agile, while focusing on their core business. To do so, many have turned to Xand for superior network infrastructure and the knowledgeable information technology professionals to support it. Without dependable IT resources, your daily business activities and long term initiatives could easily come to a standstill. Do you have the IT infrastructure and expertise you need to succeed?

Xand has the knowledge to help you transform your operations, and the solutions that can help you gain greater efficiencies and productivity. We offer technology hosting solutions that are designed to give you access to redundant infrastructure, when you need it - 24 x 7 x 365.

These services are designed to improve implementation times and reduce capital expenditures, so you can advance your e-business initiatives faster than ever, and without the burden of IT ownership. Instead, Xand offers a flexible pricing model you can easily match to your business needs.

STATE OF THE ART XAND DATA CENTER

When working with Xand as your hosting provider, your systems operate in a highly protected and reliable environment.

Xcare™ 24 x 7 SUPPORT SERVICE

The driving force behind Xand's success is our dedication to support. Over the past 14 years, Xand has earned a tremendous reputation for providing superior customer service.

Xand maintains a network operations center, staffed by expert technicians able to solve any problem you may have. When you call Xand for support, you will never reach a voicemail or answering service, only a live engineer. Since we own and manage our data center, Xand engineers are on-site 24 hours a day.

ABOUT XAND

Founded in 1990, Xand Corporation is a facilities-based provider of data center infrastructure and managed services. Xand offers complete, end-to-end services including application and server hosting, security services, disaster recovery, storage, systems engineering, network operations and Internet connectivity. The Xand Adaptive eStructure™ embodies the infrastructure and IT support needed to enable quick and reliable business operations, while providing the flexibility to grow and adapt to ever-changing demands.

Xand maintains a 30,000 sq-ft world class data center at its headquarters twenty miles north of Manhattan. The facility is connected to four carriers by diversely routed fiber optic Sonet Links, and powered by two 1.25 megawatt Caterpillar diesel generators and 1,350 KVA of redundant Liebert UPS power. The environment is temperature controlled by high-grade, redundant Liebert air conditioning and protected by an FM-200 fire suppression system. Staffed by expert technicians and engineers, Xand is able to provide comprehensive, managed, mission-critical business solutions.
